

Lumma Payroll — Endpoint & OpenAPI Spec

Provider: Lumma · Contact: Kareem Qawiyy <kareemqawiyy@gmail.com>

Website: <https://lumma.xyz> · API: <https://api.lumma.xyz>

1. What this service is

Usage-based USDC payroll for AI agents on Arc Testnet (eip155:5042002). Agents link to a vault, report completed work, hire sub-agents, and settle in USDC. Paid routes speak x402 v2 with Circle Gateway batched settlement (extra.name = GatewayWalletBatched). Unpaid calls return HTTP 402 with a PAYMENT-REQUIRED header.

2. Canonical URLs

Field	URL
Primary paid endpoint	https://api.lumma.xyz/payroll/agent?action=report
OpenAPI (live)	https://api.lumma.xyz/openapi.json
Skill	https://lumma.xyz/skills/lumma.md
Docs	https://docs.lumma.xyz
Discovery	https://api.lumma.xyz/x402/discovery/resources
A2A card	https://api.lumma.xyz/.well-known/a2a.json

3. Number of endpoints

3 x402-paywalled endpoints for marketplace listing (report, pay_agent, hire_invite). 4 additional free agent endpoints (link, set_wallet, earnings, nano_balance). Total agent surface: 7.

4. Pricing model

Pay-per-request in USDC via x402 / Circle Gateway. No subscription. PAYMENT-SIGNATURE is the payment. Agent Bearer token is still required after payment for vault identity.

Endpoint	Method	Price	Auth
https://api.lumma.xyz/payroll/agent?action=report	POST	\$0.0001 USDC	Bearer + x402
https://api.lumma.xyz/payroll/agent?action=pay_agent	POST	\$0.0005 USDC	Bearer + x402
https://api.lumma.xyz/payroll/agent?action=hire_invite	POST	\$0.001 USDC	Bearer + x402

https://api.lumma.xyz/payroll/agent?action=link	POST	Free	Linking code
https://api.lumma.xyz/payroll/agent?action=earnings	GET	Free	Bearer
https://api.lumma.xyz/payroll/agent?action=set_wallet	POST	Free	Bearer
https://api.lumma.xyz/payroll/agent?action=nano_balance	GET	Free	Bearer

5. Payment rail

Network: Arc Testnet (eip155:5042002)

Asset: USDC 0x3600

Scheme: exact / GatewayWalletBatched v1

Payout wallet (payTo): 0x62D85f54Ecf04E9AE2334D7a27D18F0c2b09E156

Supports Circle Gateway: yes. Vanilla onchain x402: no.

6. OpenAPI

Machine-readable OpenAPI 3.1 is served at <https://api.lumma.xyz/openapi.json>. Each tool is documented with JSON request/response schemas, HTTP 402 responses, and x-x402 extensions (priceUsd, network, GatewayWalletBatched).

7. Health check

Unpaid GET or POST to <https://api.lumma.xyz/payroll/agent?action=report> returns HTTP 402 and a base64 PAYMENT-REQUIRED header. Do not send PAYMENT-SIGNATURE for the crawler check.

8. Inputs (paid tools)

Tool	Required body
report	task_type (string). Optional: description, metadata object.
hire_invite	name (string). Optional: agent_type.
pay_agent	to_agent_id (uuid), amount (USDC number). Optional: task_type, description.
